

## The WCB's List of Accredited Psychologists

The following WCB accredited psychologists have agreed that the WCB may publish their contact information so that workers or employers may reach out to them regarding treatment for mental health issues arising from a work injury.

Note that the psychologists on this accredited list, may or may not be able to accept a new patient at any given time, depending on their current capacity.

However, where a WCB claim has been registered, even if not yet adjudicated, the WCB can arrange an appointment promptly, eliminating the need for workers or employers to call multiple treatment offices. The WCB may also arrange for a Mental Health Program which may involve the following list of psychologists. This program includes counselling, team-based therapy, exercise therapy, exposure therapy and return-to-work (RTW) supports. These WCB referrals may prevent moving to a different provider, at a later date, if a more comprehensive program is needed.

WCB encourages early reporting of work injury claims so that the adjudication process can begin and so that WCB can help with medical appointments such as the above.

To file a work injury claim, please visit the following link:
