

Service fee and fee codes for Saskatchewan Workers' Compensation Board primary chiropractic service providers

An intervention is an appropriate WCB coded service provided to the injured worker by the treating practitioner during the acute, sub-acute or chronic phase of the injury. This intervention or service can include the following:

- Initial visit.
- Subsequent visit (biomechanical treatment, movement patterns, myofascial therapy, electrotherapy, advice and reassurance).
- Initial conditioning assessment.
- Individual conditioning instruction.
- Group supervised exercise therapy.
- Functional conditioning.

Interventions are limited to the phases of soft tissue healing (acute, sub-acute and chronic).

Following are the fees payable by the WCB. These fees are payable where the negative response process utilizing the initial report (CHI) and progress/discharge report (CHP) has been followed.

Where a flat rate fee is indicated, the fee is intended to represent the average time required to treat a WCB customer. Where a prorated fee is indicated, the provider will bill to the next higher quarter (1/4) hour. To prepare for electronic invoicing, chiropractors are asked to bill these prorated fees using "units of care" rather than number of treatments or visits. A unit of care = the unit by which the fee is listed below (e.g., a 15 minute fee code (1/4 hour) = 0.25 unit -- Fee Code 407; \$74.26/hr/0.25 = \$18.57).

The WCB retains the right to audit the records and invoices of care providers who have provided services to a WCB customer.
