How are 2023 industry premium rates set?

The Saskatchewan WCB sets industry premium rates annually. The rate setting process ensures today's employers pay for the costs of today's claims.

Step 1: Industry classification

- Employers are grouped into industry rate codes based on their primary business activity.
- This forms the WCB's classification system, which has 50 industry rate codes.
- The collective experience of all employers in each industry rate code determines the industry premium rate.
- All employers in the same rate code start with the same industry premium rate.

Step 2: Industry premium rates

- An actuarial rate model is used to determine annual industry premium rates.
- Expected claim costs are projected for the upcoming year.
- Industry premium rate = costs/payroll.
- Premiums cover all current and future costs for claims that occur during the year.

Step 3: Experience rating

- The Experience Rating Program adjusts the industry premium rate based on an employer's individual claims experience.
- Employers can receive a discount or pay a surcharge depending on their claims experience.
- Reducing the number and cost of claims through injury prevention and workplace safety can improve your experience rating and reduce the WCB premiums you pay.

Online services reminder: in early December 2022, you will be able to view your 2023 industry rate, including your experience rating, through your WCB online account only. Sign up for your WCB online account by visiting wcbsask.com.

Updated payroll forecasts

Assessable payroll (\$ millions)	Used in 2022 rate setting	Updated 2022 projection	2023 projection
M91 rate code payroll	\$262.8	\$291.8	\$296.5

The overall increase to the premium rate for M91 is the result of increasing claims and related administration costs, which are partly offset by increasing payroll forecasted for 2023. The largest change in claims in dollar terms is related to short-term disability and vocational rehabilitation costs.
